

**Submittal:** 032018**WAR<sup>®</sup> HIGH-PERFORMANCE COATING**

Coating	Salt Spray	Kesternich	Description
WAR	1,000/hrs.	15 Cycles	Coating used outdoors for highly corrosive applications. ACQ compatible.

Specifications: 

- Product meets ASTM B-117<sup>1</sup> for salt spray corrosion testing

Features: 

- High degree of corrosion resistance
- Coating exceeds 1,000/hr. salt spray resistance
- Designed to work with ACQ treated lumber

Coating: The WAR coating is a high-grade metal surface processing technology that prevents fastener corrosion. The system consists of three layers: a metallic zinc layer, a hex-chromium passivation, and a high-grade anti-corrosion chemical conversion film.

<sup>1</sup>(Tested in accordance with the American Society of Testing Materials - ASTM B 117)
